

The mcGateway110™ is a Wi-Fi bridge between the internet and the mcModules so they can communicate with the cloud. Providing up to 200m* (650ft) range using our LPLAN (mcAir™), the mcGateway110 connects 1000+ mcModules™ while giving you ability to access them via the internet and make script changes remotely.

The mcGateway100's provide integration with IFTTT and MQTT and are Wi-Fi and Ethernet ready!

An mcGateway110 is a required component for the using the mcThings™ IoT platform.

Product Features

- mcAir™ LPLAN™ (Low Power Local Area Network)
- mcStudio™ integration
- Micro-USB powered
- Wi-Fi or Ethernet connectivity
- USB for updating
- WSP switch for Wi-Fi pairing

Dimensions

- 104.60mm x 58.15mm x 25.62mm

mcAir™

- Low Power Local Area Network custom designed for IoT applications.
- Up to 200m* wireless range
- Connect 1000s of modules to each mcGateway™
